turf

Market Need: Safety Enhanced Design

1. Documentation of the User Centered Design (UCD) process
2. Summative Testing (Reporting in Common Industry Format (NISTIR 7742)

Applicable to 8 MU Objectives:

Computerized Provider Order Entry	Drug-drug/drug-allergy interaction checks
Medication List	Medication Allergy List
Clinical Decision Support	Clinical information reconciliation
Electronic Prescribing	Electronic Medication Administration Record

Stakeholders with "greatest" need

EHR Vendors with few (or no) expertise in human factors, safety or UCD

- Vendor A: Small three person team that outsources development work
- Vendor B: Medium sized EHR development team (~100 staff)

Meaningful Use

EHR USABILITY toolkit

TURF provides an integrated toolkit for usability evaluation, testing, measurement and design.

- ✓ User Testing
- ✓ Heuristic Evaluation
- ✓ Analytics
- ✓ Training and Tutorials

TURF: An EHR Usability Assessment Tool

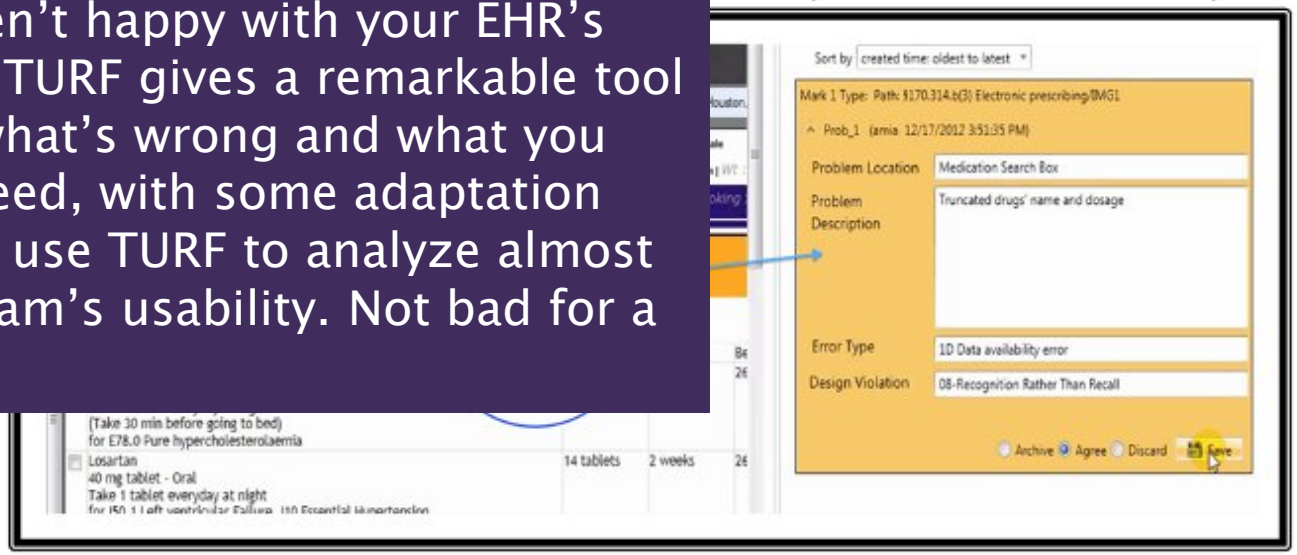
The following is a guest post by Carl Bergman from EHR Selector.

To paraphrase Mark Twain, everyone talks about EHR usability, but no one does anything about it, at least until
Center at Houston's National Center for
veral tools for measuring usability.

a Windows based app, TURF, an acronym for
from ONC's Strategic Health IT Advanced

User Testing:

- *Tool One. Heuristic Evaluation: Expert Screen Capture and Markup*. This tool takes EHR screen snapshots and let you compare them to usability standards. You can markup the screen and document the problem.



For example, you can note if the error is minor, moderate, major or catastrophic. The system has a review function, so others can look at your markup and comment. The system also compiles your edits and can generate various statistics.

"I found TURF to be a versatile, robust tool for EHR usability analysis. Its seeming complexity masks an ability to work in various settings and tackle hosts of problems."

"If you aren't happy with your EHR's interface, TURF gives a remarkable tool to show what's wrong and what you want. Indeed, with some adaptation you could use TURF to analyze almost any program's usability. Not bad for a freebie."
