Unleashing the power of biomedical big data: Genetics, EHR, and Imaging

Degui Zhi, Ph.D.

Associate Professor
School of Biomedical Informatics
University of Texas Health Science Center at Houston

Data science for big data is to about bringing insights not detectable in small data. In this talk, I will discuss some recent works in my group on uncovering insights from several modalities of biomedical big data, including genetics data, electronic health records (EHR) data, and medical imaging data.

Tuesday, March 22nd, 2022. 12p – 1p. Webcast
